

UNI-4 for imc CRONOS-SL (CRSL/UNI-4)

4-channel, universale module with isolation

The UNI-4 module offer maximum flexibility and versatility for imc CRONOS-SL and for imc CRONOS*compact* measurement systems. The 4 channels enable not only the measurement of voltage, current and the connection of IEPE (ICP)-sensors but also temperature (thermocouples, PT100 and PT1000), bridges and strain gauges (full-, half- and quarter bridge with internal completion: 120 Ω , 350 Ω and 1 k Ω).

Channel-wise independently configurable supply voltages between 0.25 V to 24 V are provided for the supply of external sensors respectively bridge measurement.

The channels are individually galvanically isolated for the voltage measurement, current and thermocouple measurement. Each channel is equipped with an own simultaneous A/D converter and adjustable filter (e.g. anti-aliasing filter).

Highlights

- Individual galvanically isolated measurement of voltage-, current- and thermocouple-mode
- Channel-wise individually configurable sensor supply
- PT100 and PT1000 support
- High signal bandwidth of up to 48 kHz
